## Welcome to The Dental Care Advantage

## Extraordinary Comfort, Care and Convenience

ID# 2811 copyright © December 2008 Dr. Jerry Simon and chrisad, inc., martin co., ca all rights reserved. The words: "Listening, Explaining, Caring, Comfortable & State-of-the-Art" & other similar communications are intended to suggest that we make every effort to provide the suggested level of care but make no superiority claims over other dental practitioners/offices. By "Lifetime Dental Care" we are not making a guarantee. We mean that we look forward to providing you with high-quality dental care throughout your life. Cosmetic cases depicted herein are representative of results attainable and may not represent actual cases. Patients shown in this brochure may or may not be actual patients of the practice. Specialty treatment may be performed by dentists who are not certified as specialists, according to state law and administrative rules.

# The Dental Care Advantage

## Putting You In Control

Our first priority is to understand your needs, so we listen to your concerns. Then we do a complete examination using video cameras and computer monitors so you can see and understand your conditions and make choices that are right for you. We welcome your questions, comments and suggestions.

## Over 180 Years of Combined Experience

The doctors are board-certified specialists and practitioners with many years of training who lecture and publish articles in professional journals. They are actively involved in ongoing continuing education in their various specialty areas so you can trust their skills.

## The Right People Make All the Difference

Our friendly team members enjoy helping people with their professional skills. They receive a minimum of 96 hours of continuing education per year in technical and service skills.

## Convenient Appointments for Busy People!

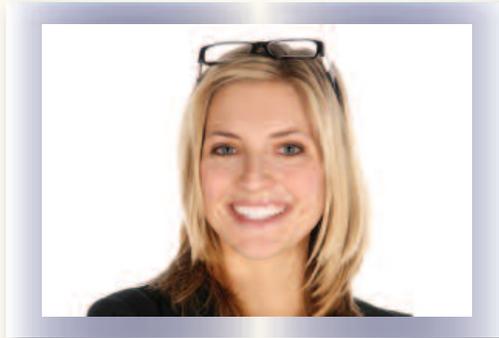

Our dentists and hygienists are available 6 days a week, early in the morning, lunch time, after work and Saturdays. With general dentists and specialists together, we can often combine appointments to get more done in fewer visits.

## How You Benefit From a Team Approach

In this age of specialization, no one dentist can do it all. It takes a team of well-trained professionals. With general dentists and specialists together, you have access to outstanding care in one convenient location.

You'll have one general dentist and hygienist for your overall care and a treatment coordinator to organize everything for your comfort and convenience. It is reassuring to know that since we are open six days a week, help is available for unexpected emergencies.

If needed, we have dental specialists ready to help. For gum treatment, root canal, orthodontic braces, oral surgery, sedation for fearful patients, treatment for headaches, dental implants or pediatric dentistry, our team has advanced training in all areas of dentistry.

## State-of-the-Art Means Better Care

We have the newest and best technologies, from low-dose digital x-rays, lasers, high tech sterilization systems, mercury-free tooth-colored fillings, and the best technicians for long lasting restorations.

For your comfort we have massager cushions on the dental chairs, paraffin hand treatments and headphones to listen to music and TV in all the rooms. You can use our computers in the reception room or use your own with our WiFi network.

## Working With Your Dental Insurance

As an unrestricted office, we can work with virtually any insurance so you get every benefit possible. We always recommend the same treatment that we would for our own family members to ensure that you understand your options and get the highest quality of care that you deserve.

## Creating Natural Looking Smiles

Cosmetic dentistry can make a world of difference in looking and feeling better. By combining art and technology, our team approach produces consistently outstanding results that look so natural, you cannot tell anything was done.

## Dental Health & Overall Health

Medical research has proven that the health of your mouth extends far beyond your gums and teeth. Inflammation in the mouth ripples throughout the body resulting in increased risk of heart attacks, strokes, diabetes, complications in pregnancy and dementia. Our focus is on regular health-oriented dental care for your lifetime.

## Ecologically Sound Dentistry

We use materials that can be recycled and disposed of in environmentally friendly ways. We have not used silver mercury fillings in over 20 years and use low-dose digital x-rays with 80% less radiation that requires no film, thus minimizing radiation exposure and eliminating polluting chemicals and toxic waste.
